

- Do not accuse or treat these families any different than others.
- Consider having the senior resident/ staff be the primary providers for these cases.
- An on call social worker may be paged at 402-888-8420 for questions related to patient treatment

* CT head scan for acute/unstable patients, consider MRI if patient is stable and to be admitted.

- Full spine MRI is also indicated in patients with suspected head injury: particularly if child is unwell or CT head was abnormal.

** The Children's Advocacy Team (CAT) order sets cover these orders

*** Skeletal (osseous) survey

- All children under 2 with suspected physical abuse.
- Consider in children 3-5 years

Disclaimer: Pathways are intended as a guide for practitioners and do not indicate an exclusive course of treatment nor serve as a standard of medical care. These pathways should be adapted by medical providers, when indicated, based on their professional judgement and taking into account individual patient and family circumstances.
