

HUBBARD CENTER FOR CHILDREN

Fun Facts

The Hubbard Center for Children, on-target to open in September 2021, brings with it a whole host of new and exciting features. **Check out our list of 20 fun facts below.**

- 1** The kitchen is almost **4X** bigger than the current kitchen at Children's, and the **8,000** square foot dining area is twice the size of the current space.
- 2** There are **1,650 doors**, **9,000 light fixtures**, and approximately **20,000 gallons of paint** in the Hubbard Center. 
- 3** The new imaging suite includes **3** ultrasound rooms, **2** MRIs, **1** CT, **1** procedure room, and **4** X-rays. Lights mirror what the sky looked like on the original hospital's completion date.
- 4** The new emergency department will have **20** exam rooms, **1** procedure/resuscitation room, and **2** trauma/resuscitation rooms.
- 5** The **trauma elevator** is the highest capacity elevator in Omaha at **16,000 pounds**. 
- 6** There will be **7** new state-of-the-art operating rooms, including **1** operating room dedicated to cardiac cases, **1** for trauma, and **1** operating room next to an MRI control room.
- 7** There will be **32** rooms in the cardiac care unit (CCU), and a rehab room that will include a treadmill, stationary bike, and weights.
- 8** There were more than **100 suppliers and contractors** on the project. 
- 9** Patients and their families will be able to enjoy the outdoor solarium and outdoor viewing garden, which has more than **27,000** square feet of space.
- 10** There will be **32** pediatric intensive care unit (PICU) rooms. There will also be a room available with equipment to care for minor burn patients.
- 11** For hematology and oncology patients, there will be **20** rooms dedicated to their care — with **8** of those available to treat bone marrow transplant patients.
- 12** The Fetal Care Center will offer **2** operating rooms, **2** labor and delivery rooms, **1** stabilization room, **2** outpatient nesting rooms, and **1** outpatient echo room.
- 13** There are over **280 glass fins** on the Hubbard tower with dichroic film that changes colors throughout the day, depending on how the sun hits them. 
- 14** A nutrition center will sit in the neonatal intensive care unit (NICU) that is twice the size of the current formula lab.
- 15** There will be **48** beds total in NICU 6 and NICU 7 that will have refrigerated drawers for breastmilk and formula storage.
- 16** Each patient floor has a dedicated shape and color scheme for easier identification.  FLOORS
- 17** Each inpatient room will have an entertainment system where families can pull up live-language interpreters, including sign language interpreters.
- 18** Families will be able to log in to their own streaming services, and pre-loaded education will be on each TV along with information about discharges.
- 19** The winding curves in the flooring are in reference to the ribbons throughout the corridors of the existing facility. 
- 20** The project finished on time despite over **52"** of winter snow, and a pandemic that caused reduced workforce and additional health and safety precautions to keep the job going!
